KUNENA FORUMS -ASETUKSET

Forum Configuration

General	Frontend	Users	Security	Avatars	Uploads	Ranking	BBCode	Integration	RSS	Plug-ins

Basic Settings

Forum Title	{Core} Clan Forums	The name of your forum
Forum E-mail Address	joni.glad@gmail.com	This is the forum's e-mail address. Make this a valid e-mail address since subscriptions are sent from it.
Forum Offline	No	Set to *Yes* if you want to take the forum section offline. The forum will still remain operational for site Super Administrators.
Session Lifetime	1800	Default is 1800 [seconds]. Session lifetime (timeout) in seconds similar to Joomla session lifetime. The session lifetime is important for access rights recalculation, whoisonline display and NEW indicator. Once a session expires beyond that timeout, access rights and the NEW indicator are reset.
Forum Offline Message	`<h2>The Forum is currently offline for maintenance.</h2>` `<div>Check back soon!</div>`	
Enable RSS feeds	Yes	The RSS feed enables users to download the latest posts to their desktop or RSS reader application. See rssreader.com for an example.
Enable PDF Creation	Yes	Set to *Yes* if you would like to enable users to download a simple PDF document with the contents of a thread. It is a simple PDF document with no mark-up or fancy layout, but it contains all the thread text.
Enable Debug Mode	No	Set *Yes* to enable debug mode.
Enable Version Check	Yes	Set *Yes* if you want Kunena to check if there are new Kunena releases available.

SEO Settings

Search Engine Friendly URLs	Yes	Select whether or not URLs are optimized for search engines. NOTE: Kunena accepts SEF URLs even if this feature has been turned off.
Do Not Use Category IDs	No	Slightly better looking URLs: http://www.domain.com/forum/category/123-message . WARNING: If set to *No*, Kunena will no longer accept these URLs!
Enable UTF-8 Support	No	Use this option if your SEF URLs are not readable. Result: http://www.domain.com/forum/2-Catégorie/123-Meßage . NOTE: Kunena accepts UTF-8 URLs even if this feature has been turned off.

Forum Configuration

Look and Feel

Topics Per Page	30	Number of topics per page to show
Messages per page	15	Number of messages per page to show
Search Results	15	Messages per page for search results
Show History	Yes	Set to *Yes* if you want the topic history shown when a reply/quote is made
History Limit	6	Number of posts to show in the history
Message Time Format	22 hours, 13 minutes ago	Choose time format for messages shown in the forum.
Hover Message Time Format	05 May 2011 12:04	Choose time format, which is shown when you hover on message time.
Show New posts	Yes	If set to *Yes*, Kunena will show the user an indicator for forums that contain new posts and which posts are new since their last visit.
Joomla Content Plugin Support	No	Set to *Yes* if you want to enable all installed Joomla content plugins in your forum. This option allows you to add bad words filtering and much more. Just be careful not to allow users to run any unprivileged tasks.
Show Announcement	Yes	Set to *Yes* if you want to show the announcement box on your forum home page.
Show avatar on Index view, Recent Topics and My Topics?	No	Set to *Yes* if you want to show user avatar on Categories view, Recent Topics and My Topics.
Show Moderators in Category Index	Yes	Set *Yes* if you want to show moderators in the category listing. *No* will allow you to have tighter layout.
Category Image Path	category_images/	Category Image Path. If you set the path as *category_images*, the full path will be *your_html_rootfolder/media/kunena/category_images/*
Show Child Category Image	Yes	If you want to show child category small icon on your forum list, set to *Yes*.
Announcement Moderator IDs	62	Add user IDs for announcement moderators (e.g. 62,63,73). Announcement moderators can add, edit, and delete the announcements.
Textarea Width	450	Adjust the width of the reply/post text entry area to match your template. The Topic Emoticon Toolbar will be wrapped across two lines if width <= 420 pixels
Textarea Height	300	Adjust the height of the reply/post text entry area to match your template
Rules Content ID	1	Enter the Joomla Article ID you want to use for the Rules Page display.
Help Article ID	1	Enter the Joomla Article ID you want to use for the Help Page display.
Enable Forum Jump	Yes	If set to *Yes*, a selector will be shown on the forum pages that allows for a quick jump to another forum or category.
Message Reporting	Yes	If you want to allow users to report any message, select *Yes*.
Reply Numbering Inside Topic	Show Real Post ID	Choose how messages will be numbered inside topic. You can show the post IDs (#324, #465, #768...) or incremental numbers (#1, #2, #3...)
Hide IP in messages from moderators	Yes	Hide IP in messages from moderators and show IP only for administrators
Category Filter in Recent Topics	Show Categories	Choose if you want show or hide following categories in recent topics.
Category List in Recent Topics	Show All Categories / Public Forum / ... News / ... General discussion / ... Offtopic / Members area / ... Clan discussion / ... Matches	Choose all the categories that you want to show or hide in recent topics.
Selectable Topic Icons	Yes	If set to *Yes*, users can choose their own topic icon. Otherwise topic icon shows the status of the topic (normal, sticky, locked etc).
Enable lightbox for images	Yes	Enable lightbox for images which are displayed in forum
Show topics from the following time	Month	Show topics from the following time
Show active users with a specific setting	All users	Show active users with a specific setting
Show active users since this time	0	Show active users since a specific time in minutes

Length Settings

Max. Subject Length	50	Maximum Subject line length. The maximum number supported by the database is 255 characters. If your site is configured to use multi-byte character sets like Unicode, UTF-8 or non-ISO-8599-x, make the maximum smaller using this formula: `round_down(255/(maximum character set byte size per character))` Example: for UTF-8, for which the max. character bite syze per character is 4 bytes: 255/4=63.
Max. Signature Length	300	Maximum number of characters allowed for the user signature.
Max. Personal Text Length	50	Maximum number of characters allowed for the personal text in user profile.

Security Settings

| Allow Guests to post/write | Yes | Set to *Yes* to allow Guests (non registered users e.a. public) write/post privileges. Set to *No* to force Guest access to be read-only. |

| Registered Users Only | No | Set to *Yes* to limit all forum access to registered users (view and post). Set to *No* to allow any Guest (non registered visitor) to at least see the forum. See 'Allow Guests to post/write' for additional Guest access control. |

| User Can Delete Own Post | Always | Choose if registered users (with no moderator rights) should be able to delete their own posts. |

| Allow to moderator to view and restore deleted messages | No | Set *Yes* if you want to allow the moderator to view and restore deleted messages in the frontend. By default only administrator can do this. |

| Allow Username Changes | No | Allow users to change their username from the profile page. |

| Allow Nickname on Posts | Yes | Set to *Yes* if you want registered users to be able to post messages with a nickname. If set to *No*, registered users will not be able to use nicknames. |

| Flood Protection | 0 | The amount of seconds a user has to wait between two consecutive posts. Set to 0 (zero) to turn Flood Protection off. NOTE: Flood Protection *can* cause degradation of performance. |

| E-mail Moderators | No | Set to *Yes* if you want e-mail notifications on new posts sent to the forum moderator(s). Note: Although every Administrator has automatically all Moderator privileges, assign them explicitly as moderators on the forum to receive e-mails too. |

| E-mail Administrators | No | Set to *Yes* if you want e-mail notifications on each new post sent to the enabled system administrator(s). |

| Enable captcha system with third party plugin | No | Captcha system On/Off, before enable this you need to have installed the captcha plug-in, look into the wiki for more information |

| Include complete post content in the e-mail sent to subscribers. | Yes | If *No*, subscribers will receive only titles of new messages. |

| Show Online Users | Yes | Set *Yes* to show list of users in pathway. |

BBCode Settings

Disable emoticons	No	Set to *Yes* to completely disable graphic emoticons (smileys).
Show spoiler tag in editor toolbar	Yes	Set to *Yes* if you want the [spoiler] tag to be listed in the post editor's toolbar.
Show video tag in editor toolbar	Yes	Set to *Yes* if you want the [video] tag to be listed in the post editor's toolbar.
Show eBay tag in editor toolbar	Yes	Set to *Yes* if you want the [ebay] tag to be listed in the post editor's toolbar.
eBay widget language code	en-us	It is important to set the proper language code as the eBay widget derives both language and currency from it. Default is en-us for ebay.com. Examples: ebay.de: de-de, ebay.at: de-at, ebay.co.uk: en-gb
Trim long URLs	Yes	Set to *Yes* if you want long URLs to be trimmed. See URL trim front and back settings.
Front portion of trimmed URLs	40	Number of characters for front portion of trimmed URLs. Trim long URLs must be set to *Yes*.
Back portion of trimmed URLs	20	Number of characters for back portion of trimmed URLs. Trim long URLs must be set to *Yes*.
Auto embed YouTube videos	Yes	Set to *Yes* if you want youtube video urls to get automatically embedded.
Auto embed eBay items	Yes	Set to *Yes* if you want eBay items and searches to get automatically embedded.
Enable Code Highlighting	No	Enables the Kunena code tag highlighting Javascript. If your members post PHP or other code fragments within code tags, turning this on will colorize the code. If your forum does not make use of such programming language posts, you might want to turn it off to avoid code tags from becoming malformed.
Display images with non-standard file extensions	Text	This option changes the way how [img] tag behaves on image extensions which are not allowed in Joomla Media Manager. Default option is *Text*, which prevents users from exploiting security vulnerabilities in badly designed Joomla extensions.
